## PROJECTS

Web Application Project - Blueprint Flooring Estimator

January 2026 - March 2026

- Developed an interactive web application using HTML, CSS, and JavaScript to calculate flooring area from uploaded blueprint images
- Implemented a canvas-based measurement tool and project-saving functionality for user workflows
- Integrated JavaScript-based measurement logic and user project storage functionality

AI Trainer

November 2025 - Present

*Confidential Project*

San Francisco, CA - Remote

- Evaluate and refine AI language model outputs to improve response accuracy, clarity, and reliability
- Provide structured feedback and annotations used to train and improve large language models
- Identify inconsistencies, errors, and more during AI model testing and quality assurance

## EXPERIENCE

IT Helpdesk Student Assistant

July 2024 - Present

*University of Washington*

Tacoma, WA

- Provide technical support for hardware, software, and network issues for students, faculty, and staff through in-person, phone, and chat support
- Manage and document support tickets to ensure accurate tracking, resolution, and escalation when needed
- Troubleshoot campus printers and devices, resolving queue errors and hardware faults
- Deliver high-quality customer service while documenting solutions and assisting users with device setup and software configuration

Social Media Program Support Micro-Intern

February - March 2025

*Marketing & Communications*

Tacoma, WA

- Analyzed social media engagement data across UW Tacoma accounts to identify performance trends and benchmark best practices
- Delivered a report with data-driven recommendations and presented insights to stakeholders in a clear, non-technical format
